Allowable Subject Matter

Claims 1-3 and 5-32 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, applicant's argument with respect to the Nicol and Lee references is persuasive – i.e. the prior art of record, individually or in combination, fails to disclose or suggest the robotic data storage library of claim 1, including: “soft power capability” (as defined by applicant) and “a power supply for providing power to a component of the library; a power switch switchable between an ON state and an OFF state; and a power controller for monitoring said power switch for a transition between said ON state and said OFF state and after detecting said transition of said power switch between said ON state and said OFF state, controlling power applied to said component”.

Regarding claim 11, applicant's argument with respect to the Nicol and Lee references is persuasive – i.e. the prior art of record, individually or in combination, fails to disclose or suggest the robotic data storage library of claim 11, including: “soft power capability” (as defined by applicant) and “a power supply for providing power to a component of the library; a power switch switchable between an ON state and an OFF state; a power controller for monitoring said power switch for a transition from said OFF state to said ON state and, after detecting said transition of said power switch from said OFF state to said ON state, delaying power applied to said component for a period of time after detection of said transition of said power switch from said OFF state to said ON state”.

Art Unit: 2116

Regarding claim 18, applicant's argument with respect to the Nicol and Lee references is persuasive – i.e. the prior art of record, individually or in combination, fails to disclose or suggest the robotic data storage library of claim 18, including: “soft power capability” (as defined by applicant) and “a power supply for providing power to a component of the library; a power switch switchable between an ON state and an OFF state; a power controller for monitoring said power switch for a transition from said ON state to said OFF state and after detecting said transition of said power switch from said ON state to said OFF state, issuing a power termination message to said component concerning termination of power to said component”.

Regarding claim 31, applicant's argument with respect to the Nicol and Lee references is persuasive – i.e. the prior art of record, individually or in combination, fails to disclose or suggest the subject matter of claim 31, including: “soft power capability” (as defined by applicant) and “a power supply for providing power to a component of the library, and a power switch switchable between an ON state and an OFF state; monitoring said power switch for a transition between said ON state and said OFF state; and controlling power applied to said component after detecting said transition between said ON state and said OFF state”.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
